How To Measure A Container For Correct Bag Size

Bag Width: Use one-half of the outer circumference of the container.

Bag Length: Use the height of the container, plus one-half of the diameter of the container bottom plus three inches (for over-hang). For square or rectangular containers use the diagonal of the container bottom, not the diameter.

How To Measure A Container For Correct Bag Size

Bag Width: Use one-half of the outer circumference of the container.

Bag Length: Use the height of the container, plus one-half of the diameter of the container bottom plus three inches (for over-hang). For square or rectangular containers use the diagonal of the container bottom, not the diameter.

Corn Broom Terminology

- Broom Corn** A fiber grown specifically for making brooms. It is durable, long-lasting and sweeps medium to fine debris.
- Yucca** A filler fiber that is sometimes called "grass". It is cheaper than Broom Corn but not as flexible nor does it sweep as fine of debris.
- Rattan** A coarse natural fiber used in industrial upright brooms to stiffen it for heavy use.
